AN INTRODUCTION FOR USERS

The Faculty Roster System's U. S. Medical School Faculty, 1993 is compiled to serve as a quick reference source answering some of the most frequently asked questions about U. S. medical school faculty.

Proper use of this book requires that several caveats be noted.

1. The data contained in the Faculty Roster database are updated daily. The information contained in this book was compiled in June, 1993.

2. The data are reported voluntarily by the schools and thus reflect school-to-school differences in timeliness and consistency of reporting.

3. It is our best estimate that the database contains records for approximately 85 percent of all active full-time U. S. medical school faculty. This undercount should be taken into consideration when using the data.

4. The term selected minorities used in this book should be distinguished from that of underrepresented minorities used by the Association in classifying students for recruitment purposes. Selected minorities includes all individuals who classify themselves as Puerto Rican, whereas underrepresented minorities distinguishes between mainland and Commonwealth Puerto Ricans.
